**UPCOMING:
16th International Summer School of Immunology
3-11 September 2011, Hvar, Croatia**

Deadline for registration: July 1, 2011

Information on the event and how to apply can be found at: www.febs-hvar2011.org

Dear Colleagues,

the 16th International Summer School of Immunology (3-11 September 2011, Hvar, Croatia) will provide attending students a deeper insight into the basic knowledge and novel development of immunology as well as foster maximal interactions between young immunologists in Europe and the world. The format will be a combination of lectures, discussion and poster sessions allowing the students to present and discuss their own work. The summer school is limited to 105 participants (PhD students, early postdocs).

May we kindly ask for your support in bringing this traditional high level immunology summer school to the attention of talented PhD students and early postdocs within your graduate school or research program? We greatly appreciate your support in displaying the poster in your department or in other suitable places. Thank you very much.

With best regards,

for the Organizing Committee

(Meinrad Busslinger, Diane Mathis, Bojan Polic, Klaus Rajewsky, Michael Reth and Hans-Reimer Rodewald)
